1000	Not in combination with 1036 and selecting pickup-locker.		
1133, 1134	1082		
2086	Not in combination with 1036 and selecting Postautomat.		
1036	2216		
Additional info			
1036 - Value added service (VAS) 1036 is not applicable/valid when using pick-up locker locations. : mandatory use of Pickup Point API. Removed value added service 1036. Our systems does not allow driver to deliver in pickup-locker. Several Posten deliverypoints are pickup-lockers, identified by categories in the PuP API response. Note that 1036 is available together with 1134 "Personal delivery", but will be redirected to a manned pickup-point. This also applies for VAS'es 1063, 1083 and 1082 etc. Customers and/or TA-vendors is advised to activate a pop-up message or similar in the GUI for info, and support filtering for parcel lockers using the PickupPointType in Bring API-responses - "Manned" or "locker". Please see https://developer.bring.com/ for details.			
Electronic notification is included.			
TDT element (SG8) TDT+20+++NPB:87			
*0041 can be used. But it is only needed in very special cases when it is postman route and not to pickup point.			
**1083. Agreement only. Should be locked. Only adapted to temperature-sensitive goods (eg tablets, creams) that require storage within 5-24 degrees.
