

Collect At Store

(BIG14)

In addition to B2C deliveries via Bring Pick Up Points, Bring B2B customers with a shop network may use their own stores as a supplementary channel for distribution to private persons buying via their WEB shop.

This service is called **Collect At Store** and it is available on Bring Parcels product **0332 – CarryOn HomeShopping BulkSplit** to Denmark, Norway and Sweden.

Parcels of this type are distributed in Brings B2B network and includes SMS and/or email advise to the final recipient based on service code **1095 – Delivery Notification to 3rd Party** and a valid mobile number and/or email address that is mandatory. It is recommended to use both mobile number and e-mail address to ensure that the final recipient is advised.

The store must take care of the delivery to the final recipient and Brings responsibility will end when the parcel has been delivered to the store.

EDI:

EDI data must contain following information:

- FTX+SSR segment with service code 1095 in element 4440.
- NAD segment with qualifier DP (Delivery Party) containing the store name and address
- NAD segment with qualifier CN (Consignee) containing the name and address of the final recipient. It is allowed to use the store address instead of the private address of the recipient
- COM segment connected to NAD+CN containing a valid mobile number (qualifier AL) and/or an email address (qualifier EM)

Label:

The label must contain following information:

- Service code and name: **1095 – Delivery Notification to 3rd Party**
- The **To:** field on the label must contain the final recipient's name **c/o** Store name and address
- The final recipient's name and home address may be placed in the upper right corner of the transport instruction section (see example at the next page)
