Appendix 2 for all Bring Courier, Home Delivery and Cargo SE/DK.

Version: 1.10 November - 2022

Brings D04A BIG 14 supports all Bring company and their TMS system. Exceptions the SAME DAY (EXPRESS) products that require a web service (API). All new integrations should use BIG 14 D04A.
TDT segment specifies the transport code and is specified with code BIG14 while BIG01 / NCP11 version (previous version) are in parentheses. Anyway - the individual IG for each version to be read to verify that this is correct.

 TSR segment - it is also stated EDIFACT codes in the document that contains the product and additional services. This applies codes for previous versions of D04A IFTMIN. (NCP11/BIG01).

Everyone must read Appendix 2A - Description for details about each company in Bring and what differences there are per country. The reason for this is that Bring consists of several companies with different TMS systems.

Change log in the pdf document. Appendix2A.

Yellow is indicating change from last version from Bring

3050 Groupage	9	BDS (*TSR+BVS')	SE	All**	None											
3267 Partload	14	BDS (*TSR+BVS')	SE	All**	None											

* Vårgårda is using a different transport-system and therefore we need an additional systemcode for routing the EDI files. This you place in the SG 8 group - TSR. Please se Appendix2A for description. **Please ask your contact at Vårgårda for this information. Brings customer should pick Partload for goods from 999 kg for Vårgårda and 2499 kg for Bring Cargo National.
